1. 截图

2. 截图, 但 permission denied 的问题没有能够解决,不知道原因。

```
root@VM1:/home/kaltsit/network1# sudo python3 udpclient.py
Client started. Type your messages below:
'hello'
Traceback (most recent call last):
   File "udpclient.py", line 30, in <module>
        main()
   File "udpclient.py", line 25, in main
        client.sendto(message.encode('utf-8'), ('10.255.255.255'
5000))
PermissionError: [Errno 13] Permission denied
```
